

Ashley
Addiction Treatment

TOP 10

Warning Signs
Your Child May be
Misusing Drugs or Alcohol

Ashley has helped thousands of young adults and their families overcome addiction and start their recovery journeys. We know how very important parents of young adults are in aiding in their child's recovery.

In 2016, Ashley added a specialized program for 18-25 year olds, as the central part of our effort to more effectively receive, treat, and support young adults and their families. Our age-separate programming allows us to offer your child specific clinical interventions, proven most beneficial to that age group and their families. As we see addiction increase among our youth, we want to stand with parents and help you help the ones you care about most.

- 1 changes in physical appearance – rapid weight loss or gain
- 2 frequent sickness – real or possibly faked
- 3 avoidance or absenteeism – loss of interest in family involvement
- 4 loss of job or poor academic performance
- 5 lack of care for their appearance, poor hygiene
- 6 change in mood, high level of irritability
- 7 withdrawn, quiet, uncommunicative
- 8 loss of interest in activities that used to interest them
- 9 constantly asks for money or valuables turn up missing
- 10 deception – lies or excuses that don't make sense

We're here to help.

Our Young Adult Program is your child's first step to healing. Ask about our extended care program.
